

Sneha Vinod

Foster City, CA 94404

650-787-0885 — sneha22.vinod@gmail.com — www.linkedin.com/in/snehavin — snehavin.github.io

Education

Santa Clara University, Leavey School of Business

March 2025

Master of Science in Information Systems, GPA: 3.9

Relevant Coursework: Deep Learning, Natural Language Processing, Big Data Modeling

Beta Gamma Sigma Honoree – Top 15% of Business School Class

Santa Clara University, Leavey School of Business

December 2022

Bachelor of Science in Management Information Systems, Magna Cum Laude, GPA: 3.8

Relevant Coursework: Statistics & Data Analysis, Data Science w/ Python

Technical Skills & Certifications

Languages: Python, SQL, Java

Libraries/Frameworks: pandas, NumPy, scikit-learn, TensorFlow Keras, CatBoost

Tools: Jupyter Notebooks, Databricks, MySQL Workbench, IntelliJ IDEA, Tableau

Cloud Platforms: AWS(Bedrock, Lambda, DynamoDB, API Gateway, EC2)

Core Competencies: Machine Learning, Neural Networks, Natural Language Processing, Feature Engineering, Prompt Engineering, Model Evaluation, Data Cleaning, Database Design, Data Visualization

Google Data Analytics Certification, Coursera 2023

Experience

Data Engineering Intern, Cadent - San Jose, CA

June 2024 - August 2024

- Enhanced data governance by implementing Unity Catalog on Databricks, establishing a unified data catalog that improved data security and reduced data querying costs
- Developed external connections to BigQuery, Snowflake, and SQL Server, enabling federated querying
- Introduced data lineage tracking, allowing insight into data transformations and dependencies

Data Science Intern, Cadent - Remote

March 2024 - May 2024

- Optimized and deployed a probabilistic classification model into production to predict advertising bid outcomes, utilizing 150 million rows of data
- Applied weights to emphasize common bidding scenarios, enabling training on 7x less data which reduced compute time and cost while maintaining model performance
- Evaluated model performance using Brier Score, precision, and recall
- Conducted feature engineering to introduce 4 new features and evaluate impact on model performance

Market Development Intern, CommScope - Sunnyvale, CA

June 2022 - Sept. 2022

- Developed a market development plan to increase revenue by \$39 million and reach an 8% market share
- Identified high-potential segments of the US market and strategic partnerships to drive growth
- Created visualizations to deliver data-driven revenue insights to Business Development and Sales teams

University Projects

Natural Language Processing Project

- Developed a Job Search Chatbot using the OpenAI API, integrating Retrieval-Augmented Generation (RAG) with LangChain to match users' resumes and desired job titles with relevant job postings
- Enhanced chatbot accuracy with prompt engineering and conversational memory

Generative AI Chatbot Project, PayActiv

- Built a Customer Service Chatbot, using Anthropic Claude, for a Fintech company to address account creation user queries
- Developed backend API functions for the chatbot to query and modify relevant databases
- Optimized chatbot responses through prompt engineering and iterative testing with Amazon Bedrock
